

STREAM VISION

# STREAM VISION QUICK GUIDE

for iOS

## STREAM VISION APPLICATION IS A FREE PROPRIETARY SOFTWARE BY YUKON ADVANCED OPTICS WORLDWIDE DESIGNED:

- 1.** To stream live image from optical device to your mobile device.
- 2.** To control selected functions of your optical device using your mobile device.
- 3.** To update firmware of your optical device.
- 4.** To stream live video from optical device to youtube channel.

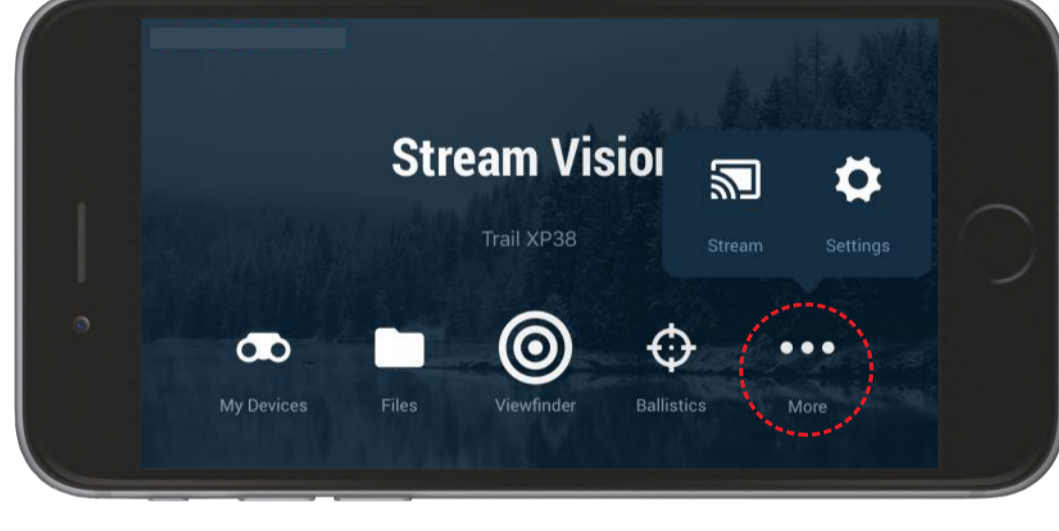

## Motion Detection

Motion Detection allows you to automatically detect a moving object in the field of view of your optical device. You are free to select accuracy based on object size and type of detection notification – sound or vibration. Remember to immobilize your optical device for better accuracy.

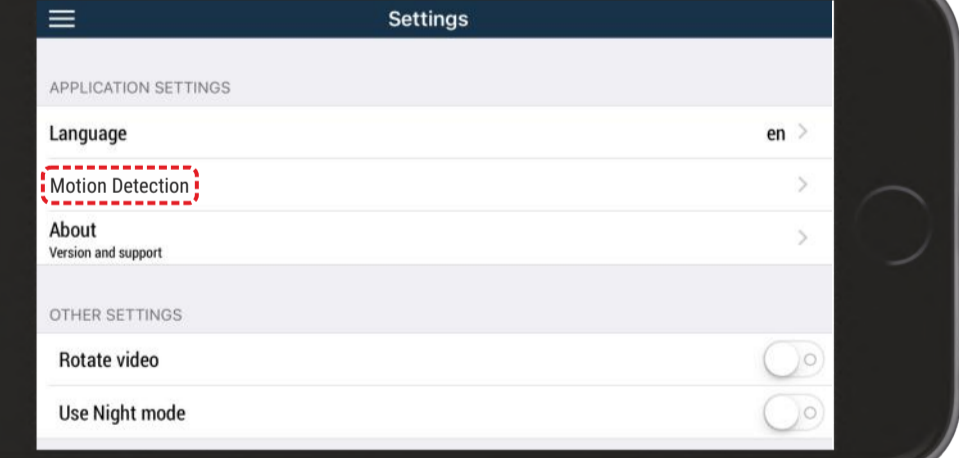

### STEP 1.

Tap icon "More" on the main screen of Stream Vision. Select "Settings".

### STEP 2.

Select "Motion detection" to go to Settings.

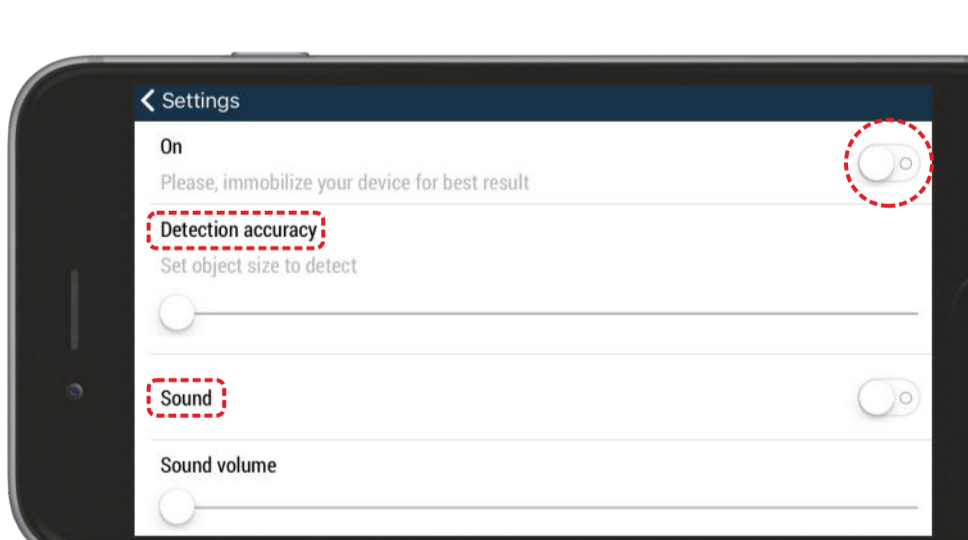

### STEP 3.

Select "On" to activate Motion detection.

Attention! Please make sure your optical device has been immobilized. This will ensure more accurate operation.

Set up detection accuracy – the smaller size of object to detect you choose, the more accurate detection of small objects is.

Set up sound or vibration notification – your mobile device will sound or vibration once an object in the field of view is detected.

### STEP 4.

You can also access Motion Detection by tapping the respective icon in the Viewfinder mode.

"Motion on/off" and "Accuracy" are available in the quick menu.

Tap "Settings" to go to other settings of Motion Detection.
